UMAP2

UMAP1

- |                             |   |
|-----------------------------|---|
| ● Cd4+ macrophage           | ● early pro-B cell                        |
| ● HSC enriched fraction     | ● erythroid progenitor                    |
| ● MPP Fraction A            | ● granulocyte                             |
| ● MPP Fraction B            | ● granulocytopoietic cell                 |
| ● MPP Fraction C            | ● immature B cell                         |
| ● Marrow Cd4 T cell         | ● late pro-B cell                         |
| ● Marrow-unknown-progenitor | ● megakaryocyte-erythroid progenitor cell |
| ● NK cell                   | ● naive B cell                            |
| ● basophil                  | ● precursor B cell                        |
